

# PRoPL

## Pearson Review of Progress and Learning

**The Pearson Review of Progress and Learning (PRoPL) is a series of three standards-based assessments designed to measure student growth during the school year.** The tests are intended to be completed in about 30 minutes and provide immediate educator feedback on areas of student strengths and opportunities for learning toward meeting end-of-year goals. With PRoPL, you will experience accurate and actionable results and reduced interim test-taking time!

### Interim assessment administration

- Administered during three designated test windows (fall, winter, spring)
- Uses a blueprint proportionate to a summative design
- Test items developed with summative quality and rigor
- Delivered on the same platform and delivery system (TestNav) as summative assessment

### Interim assessment results

- Provides a graph of student growth following completion of the winter and spring interim tests
- Allows for a projection of performance on the summative test, following a study utilizing interim and summative results
- Results delivered as scale scores, MetaMetrics Measures, and 3–5 Performance levels, depending on grade level, are provided by Grade and subject. Reporting Category profile and cluster level reports are also provided. Standards-based item-level reporting for grades K–2 provides educators with student response, standard, and item difficulty data to inform focused support
- Report data exports available

## 2025–2026 Interim assessments available

- Grades K–2
  - Reading
  - Math
- Grades 3–8
  - Reading (computer adaptive)
  - Math (computer adaptive)
  - Social Studies
